

# SOFT-SET™ PIPE SUPPORTS

**We value the safekeeping of your pipeline assets.** Allan Edwards SOFT-SET geotextile pipe supports protect pipelines from scratching or gouging caused by rocky terrain. Unlike sharp edges found on hard plastic stands, SOFT-SET pipe supports eliminate stress points by evenly cushioning and protecting the pipe from underneath. Each bag can also be used for multiple pipe diameters. Because laying SOFT-SET pipe supports requires no personnel to be in the ditch, it eliminates potential hazards for a safer jobsite environment.

**SOFT-SET pipe supports - saving you time and money on your pipeline construction projects.**

## SOFT-SET Pipe Supports Features & Advantages:

- Easy-lift / Easy-string on right-of-way (ROW)
- Cathodic protection not restricted
- Filled SOFT-SET bag cannot scratch pipe
- Customizable to multiple pipe diameters
- No spreader bars needed
- No specialized equipment required to lay
- No personnel required in ditch, jobsite crews are safeguarded against potential hazards
- Can be filled remotely
- Minimum 4X safety factor
